CAREER OBJECTIVES

- I am capable of working in your organization where I will pursue new knowledge, sharpen my skills and put my efforts to achieving the goals of organization.

PROJECTS

- Expense Tracker System:** Developed a comprehensive Expense Management System using MERN stack, with the primary objective of delivering an efficient, user-friendly, and dependable platform for individuals to oversee their financial transactions.
- E-commerce Website:** Build the E-commerce Website using the MERN stack which provides customers with a seamless and secure online shopping experience, while offering efficient management tools for the administrators to handle products, orders, and user data.
- Doctor Appointment System:** Build the Doctor's Appointment System using the MERN stack which aims to provide an efficient, user-friendly, and reliable platform for both patients and doctors to manage the appointments, leading to improved patient-doctor interactions and streamlined scheduling processes.
- Real-Time Chat Application (Current-Project):** Developing the the Real-Time Chat Application with integrated AI Bot using the MERN stack and Socket.io enables users to engage in real-time chat conversations with each other while also enjoying the benefits of an AI bot's assistance and interactivity.
